The "Before" Numbers

Mar 2025 – Mar 2026 • AIMBase data • 83 dealers

MONTHLY LEAD VOLUME – PRE-LAUNCH

Gold bar = Jun 2025 peak • Dashed = ~19,200 baseline avg

~60% External Paid (Meta)
~40% Website-Captured
Meta leads are unaffected
by the website change

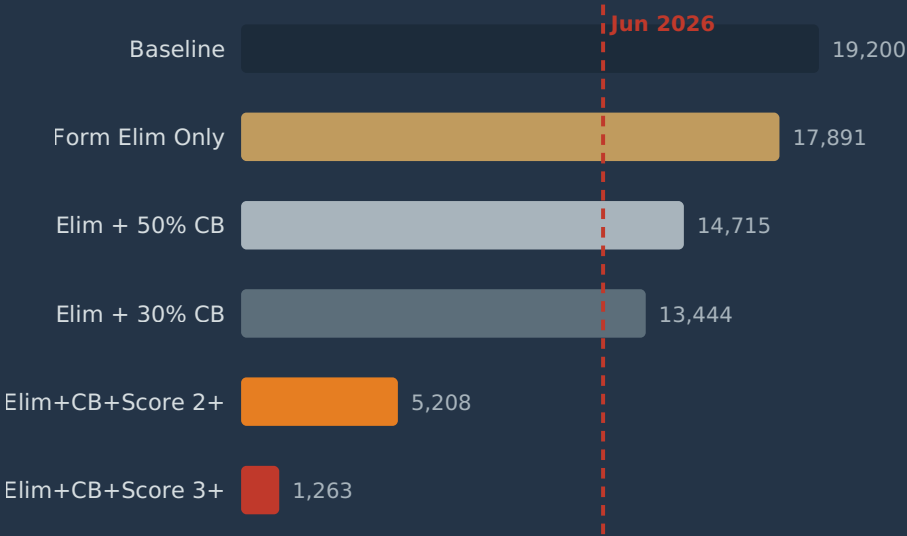

FORECAST VS. ACTUAL

Where Did June 2026 Land?

Forecasted 7% from form elimination June 2026 running 37% vs. baseline

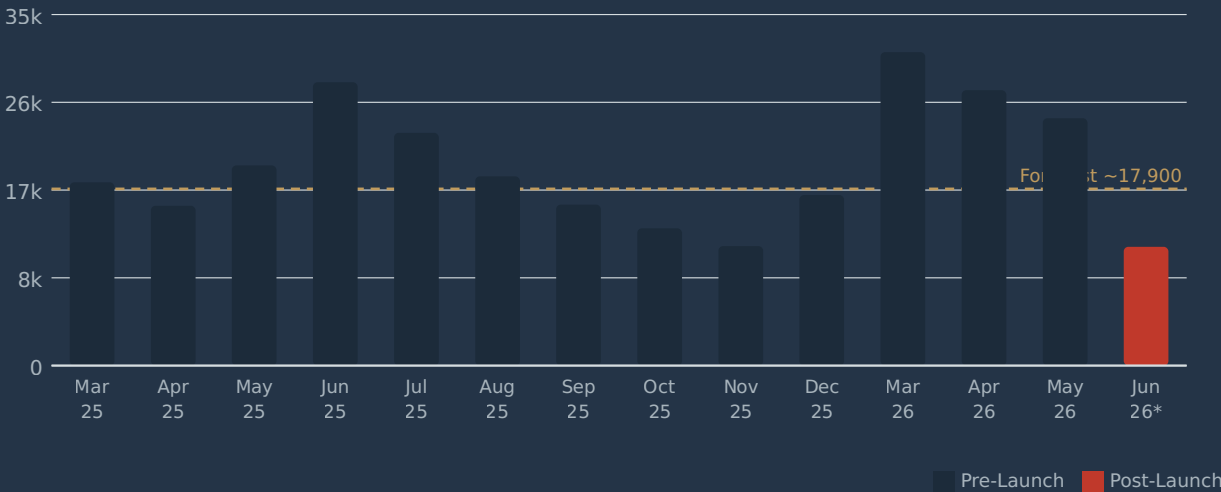

FORECAST SCENARIO MATRIX

Red line = June 2026 actual pace (~12,026/mo)

MONTHLY VOLUME BASELINE THROUGH POST-LAUNCH

*June 2026 projected from 18 days Gold dashed = forecast ~17,900

FORECAST VS. ACTUAL KEY METRICS

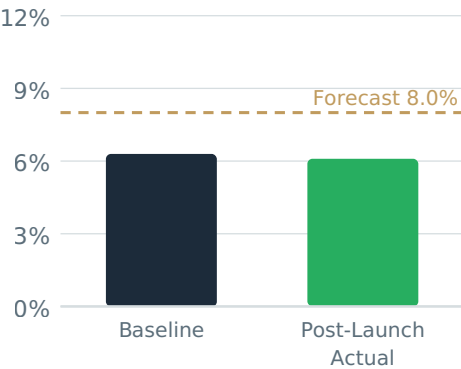

METRIC	BASELINE	FORECAST	ACTUAL JUNE 2026	VS. FORECAST
Total leads / mo	~19,200	~17,900 (7%)	~12,026	33%
Per dealer / mo	231	~216	~145	33%
External Paid share	~60%	~60% (unchanged)	81%	Meta dominant
Score 3+ rate	6.3%	Flat-to-up	6.1%	Roughly flat
Travel Trailer share	68%	~66%	52%	TC overrepresented

QUALITY & DIAGNOSTICS

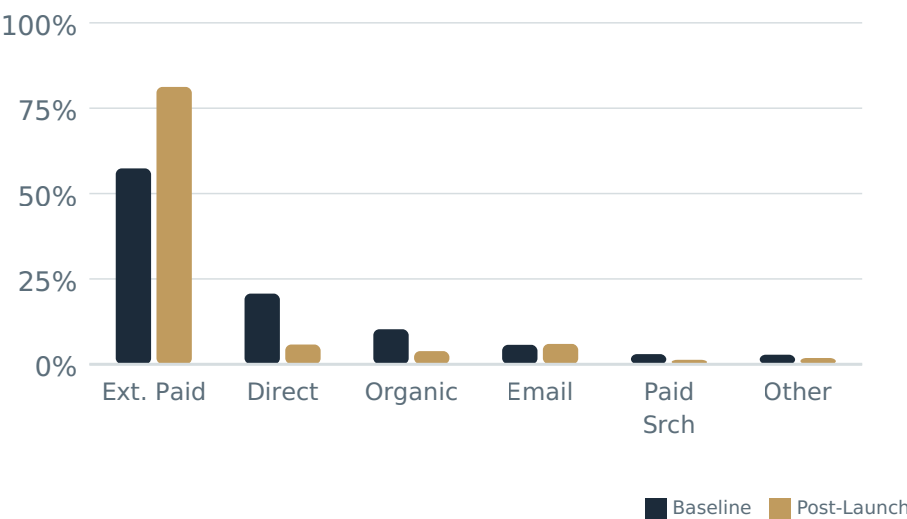

What to Watch

Post-launch is only 22 days • Run full 60–90 day window before final conclusions

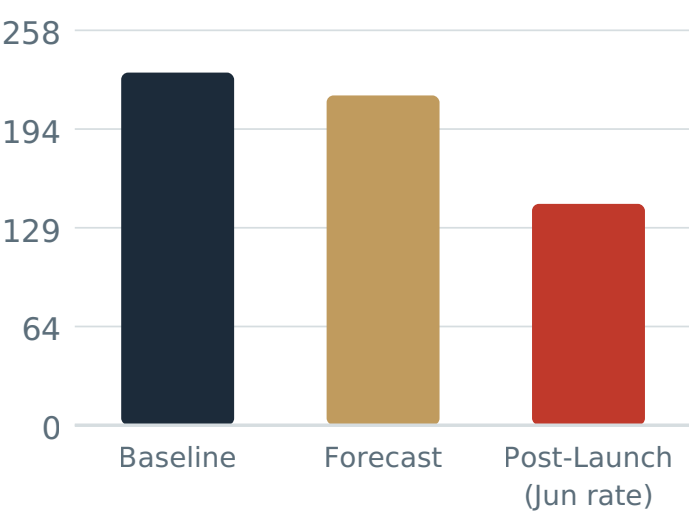

SCORE 3+ RATE

SOURCE MIX SHIFT

LEADS / DEALER / MONTH

⚠ Volume below forecast floor

June pace (~12,026/mo) is ~33% vs. forecast ~17,900. Check: was a brochure checkbox added? Did consolidated form field count cut CVR? Did new-site top-of-funnel traffic fall?

⚠ External Paid share surged to 81%

Baseline was ~57% Meta. Post-launch jump to 81% means website-captured volume (Direct, Organic, Email) collapsed more than paid. New site may be converting on-site visitors at a lower rate.

🟢 Score 3+ rate holding roughly flat

Post-launch 6.1% vs. 6.3% baseline within noise. The "fewer but higher-quality leads" thesis is not yet disproved. Watch over 60–90 days.

🗓... Seasonality & window size caveat

June 2025 was the annual peak at 28,693 leads. Compare June-to-June once the full month closes and re-run after 90 days before drawing final conclusions.
