Score Distribution (Baseline vs. Post-Launch)

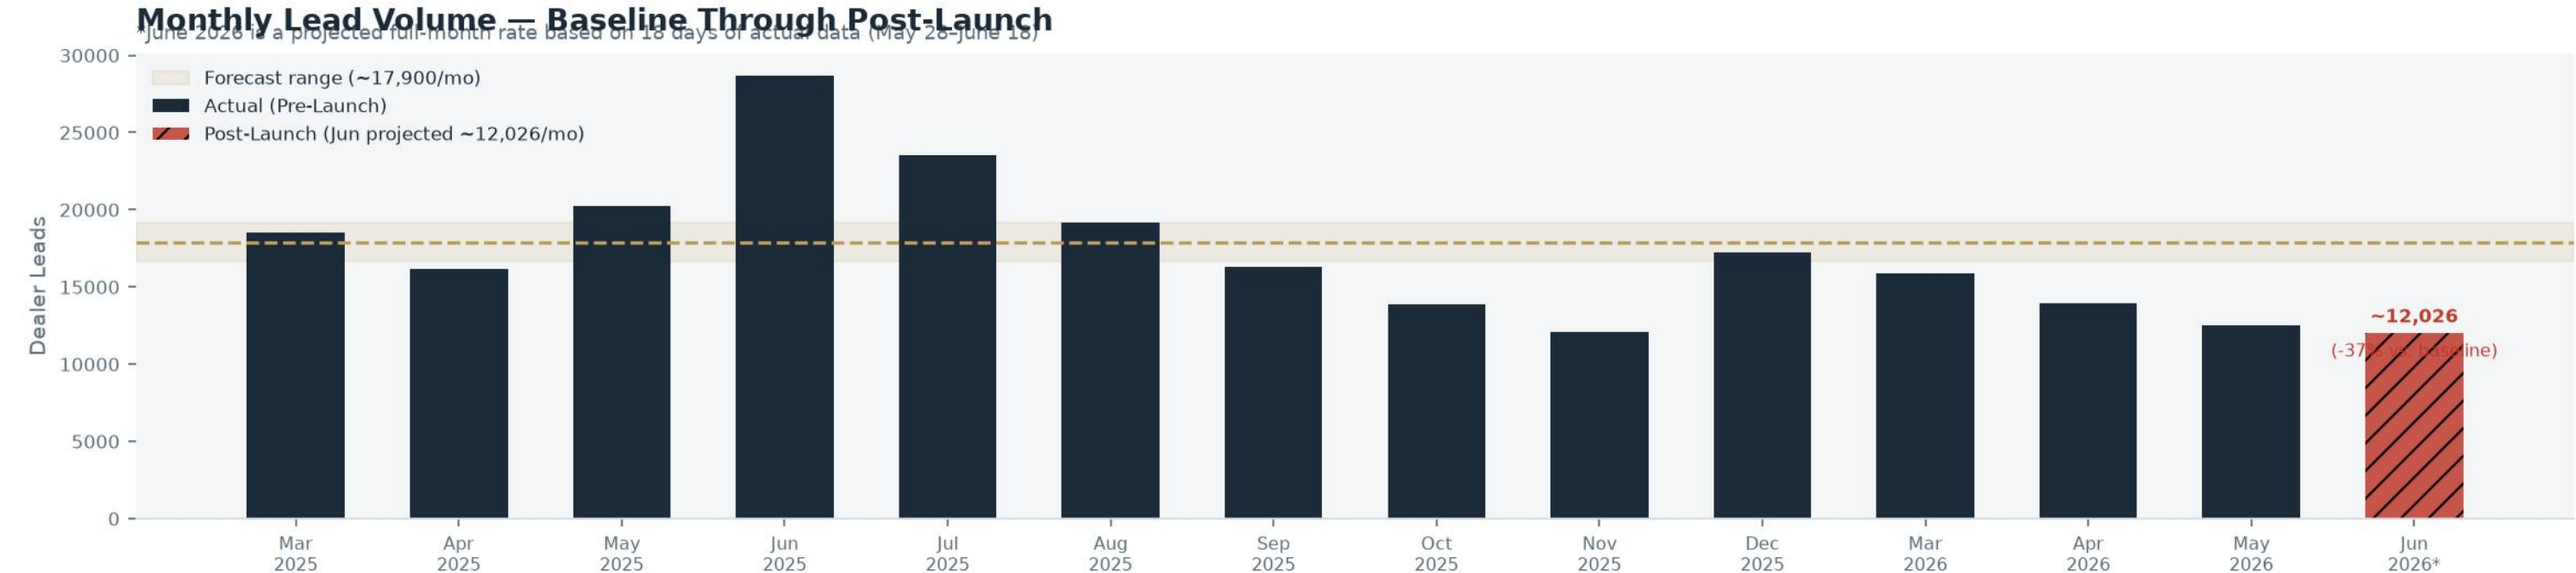

Brand Split (TT vs. TC)

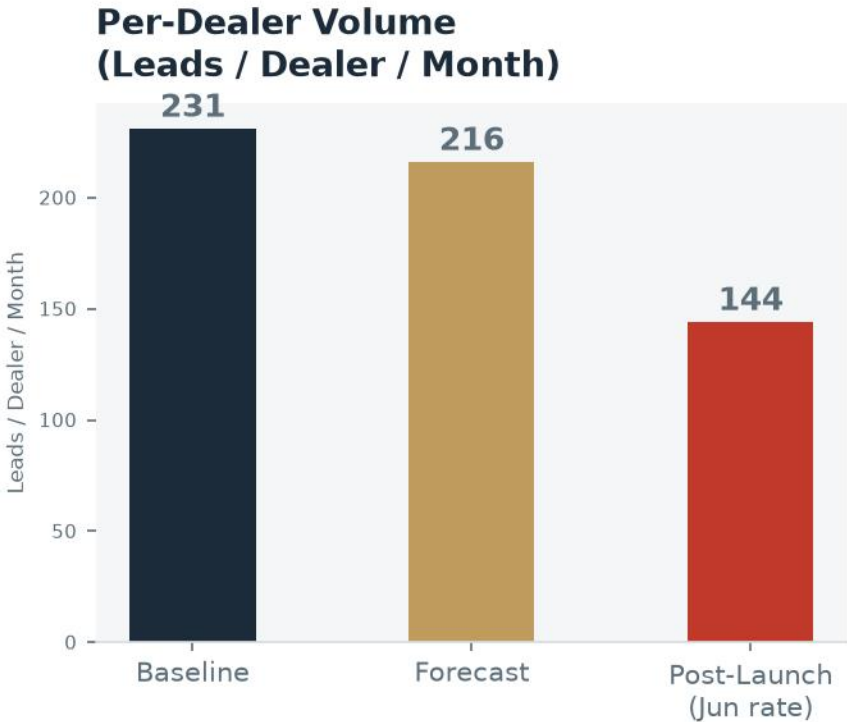

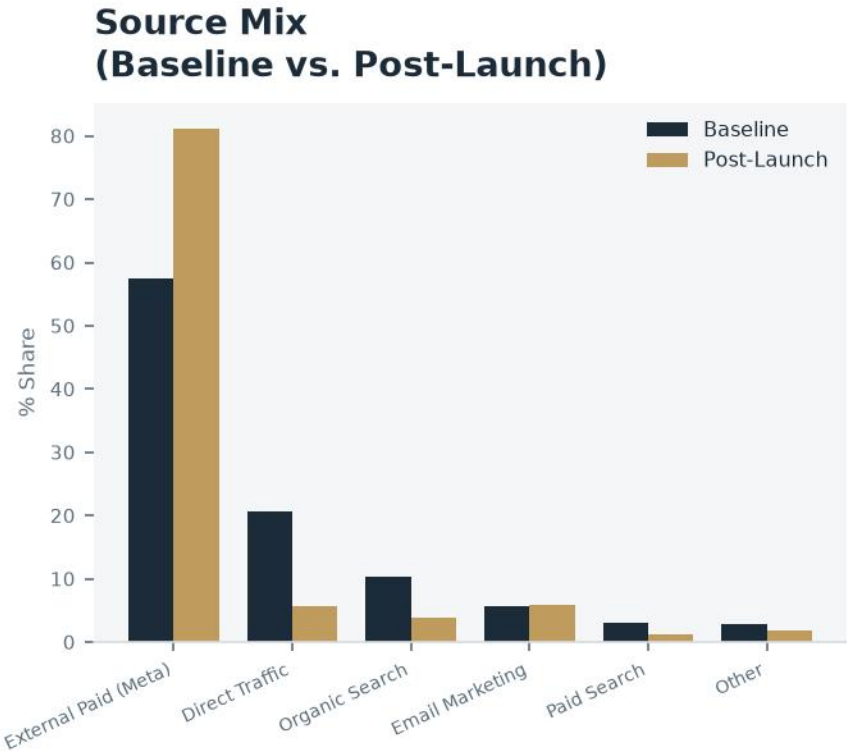

Forecast vs. Actual — Key Metrics

Metric	Baseline	Forecast	Actual (June '26)
Total leads / mo	19,200	17,900	~12,026
Per dealer / mo	231	216	144
External Paid share	~60%	~60%	81%
Score 3+ rate	8.0%	Flat-to-up	6.1%
TT share	68%	~66%	52%

What to Watch Next · Diagnostic Checklist

⚠ Volume below forecast floor

June pace (~12,026/mo) is -33% vs. forecast ~17,900. Check: was a brochure checkbox added? Did brochure CVR drop from longer form? Did form site Score 3+ rate (6.1%) fall below the 8.0% baseline. Score inflation may not be shifting from forms to on-site behaviors.

→ Seasonality: compare June-to-June for cleaner read

June 2025 was 28,693 leads — the annual peak. June 2026 rate reflects post-launch + seasonal overlap. Wait for full month + 60-90 day window. **TC dealers may see disproportionate impact** when Coach has lower Score 3+ (5.1% vs 9.5% TT) and lower configurator opt-in (0.7% vs 2.7% TT). Segment by brand before drawing conclusions.
